“The Role of Endodontics After Dental Traumatic Injuries Part II of II”

Dr. Haider Zubaidi

Tuesday, May 17, 2016

A traumatic injury to the tooth results in damage to many dental and periradicular structures, making the management and consequences of these injuries multifactorial. Knowledge of the interrelating healing patterns of these tissues is essential.

This presentation will concentrate on the role of dentino-pulpal complex in the pathogenesis of disease subsequent to dentinal trauma and how treatment of this complex can contribute to favorable healing after an injury.

This will be part one of two presentations that will address different types of dental trauma as simple as tooth infractions, different types of trauma related resorption, avulsion and more. By the end of each presentation the participants will be able to understand the description, etiology, diagnosis, treatment and prognosis of each different dental trauma.

Dr. Zubaidi graduated from the University of Michigan School of Dentistry in 2003. He practiced general dentistry part time while teaching full time as an associate clinical professor at the university of Florida, Department of Prosthodontics. He then completed his residency and fellowship in Endodontics at the University of Florida. He has been in private practice specializing in Endodontics in Lakeland and Winter Haven for the past five years. Dr. Zubaidi has previously presented for the ADA dental convention in Orlando, FL., The American Association of Endodontist “AAE” annual meeting in Philadelphia and has multiple of his endodontically treated teeth published in The Pathways Of The Pulp.

This meeting will be held at Grasslands Golf & Country Club located at 1600 Grasslands, Blvd., Lakeland. Happy hour begins @ 6 p.m. Dinner will be served @ 6:30 p.m. and the meeting will start @ 7 p.m. Please RSVP to Tisha Talbot via email pcdaemail@gmail.com
