

POLK COUNTY DENTAL ASSOCIATION

AN AFFILIATE OF THE WEST COAST DISTRICT,
AMERICAN & FLORIDA DENTAL ASSOCIATIONS

Polk County Dental Association Biologic Complications in Implant Dentistry Luiz H. Gonzaga, D.D.S., M.S. Tuesday, October 17, 2017

Dental implants are increasingly being used as the primary choice to restore function and esthetics in our patients. With this, clinicians are seeing an increase in biologic, mechanical, and technical complications associated with these rehabilitations. This presentation will focus on the biologic situations, by presenting a structured, evidence-based approach into the diagnosis, management and prevention of these complications.

Several questions will be answered during this lecture:

- How do we perform an examination of a dental implant and restoration?
- What is the difference between mucositis and peri-implantitis?
- Are there any risk factors for getting peri-implantitis?
- When is an implant considered failing?
- What are the treatment options for a failing implant?
- When do we “hang it up” and start over?

Learning objectives:

1. Be able to diagnose and describe the etiology of peri-implantitis
2. Understand the risk factors, prevention, and treatment of peri-implantitis
3. Understand the options for treatment of peri-implantitis
4. Become familiar with the procedures for implant removal

This meeting will be held at Grasslands Golf & Country Club located at 1600 Grasslands Blvd., Lakeland. Dinner will be served @ 6:30 p.m. and the meeting will start @ 7 p.m. Please RSVP to Tisha Talbot via email pcdaemail@gmail.com
